

SPEND LESS TIME MENDING FENCES

It's payback time.

History has shown that investing in wood and steel fencing is like burning a pile of cash for heat. It works, but it's an expensive, short term solution.

Fortunately, those days are over. Bedford Technology's recycled plastic lumber, including posts and beams built with long-lasting FiberForce and BarForce products, is a multi-generational fencing solution that enables you to, "build it once and forget about it"

It won't fade or rot and it withstands winds strong enough to permanently bend or snap traditional fencing materials. Even in ideal conditions, you're faced with replacing your wood and metal fencing every 5-10 years. Instead, invest in a long term solution that is attractive and adds value for generations.

Features:

- 50 year limited warranty
- No splintering or rotting
- Low maintenance
- No painting or staining
- Environmentally friendly
- Sanitary
- Wide variety of colors and finishes
- Resistant to termites, mold, salt and oils

Products:

Uses:

- Trellis configurations
- Fencing in multiple profiles
- Pens and stables
- Decking
- Any growing operation that uses stakes
- High-value equine operations

Bedford Technology is the leading manufacturer of premium, structural and reinforced plastic lumber for commercial markets, including marine, agriculture and industrial and other outdoor markets.
