

INDUSTRIAL STRENGTH STRUCTURAL INTEGRITY.

Plastic lumber simply does the job better and longer.

Every single day, engineers are discovering innovative uses for plastic lumber in the industrial sector. Better performance, predictability and durability can mean the difference between uptime and downtime; profit and loss. No matter what you make, move, protect or distribute – we have a plastic lumber-based solution to make your job easier and more profitable.

Available in a variety of bright colors, our HDPE plastic lumber can be developed into any custom industrial or safety related profile. From simple, yet sturdy cribbing to custom solutions, our industrial products have the strength to optimize safety when stabilizing heavy loads and are built to withstand environmental exposures and repeated heavy use.

Features:

- Can be manufactured in custom shapes for specialized purposes
- Won't rot or degrade
- Sustainable
- Available in custom colors

Uses:

- Cribbing
- Dunnage
- Pallets
- Stop Logs
- Staff Gauge
- Railroad Ties
- Door Frames and Scaffolding(CE)
- Equipment mats, pallets
- Speed bumps, guard rails, platform boards
- Pipe supports, air conditioning pads (Tyson Pads)
- Equipment mats

Products:

Bedford Technology is the leading manufacturer of premium, structural and reinforced plastic lumber for commercial markets, including marine, agriculture and industrial and other outdoor markets. We can't wait to create the next amazing thing you want to do.
