

SMARTER CONTAINMENT. SMARTER PROTECTION. SMARTER LUMBER.

For kinder, gentler, long lasting barriers.

Structural plastic lumber, made from recycled HDPE plastics, are an ideal solution for the large animal and equine industries. Low in long-term costs and maintenance, our plastic lumber offers a safer method of fencing and corralling animals.

Choose our SelectForce® and FiberForce® for paddocks, stalls and other heavy-duty uses related to containing and transporting large animals. It's longer-lasting and easier to clean than wood for healthier environments. You drill and cut our plastic lumber the same as traditional building products, but with its impressive durability, you won't have to do it as often. It's sustainable and is made from post-consumer recycled products that would otherwise end up in a landfill.

Features:

- Won't rot, splinter or split
- Low maintenance
- Impact and chew resistant
- Ability to disinfect and quarantine stalls easily
- No painting or staining
- Safer than wood—discourages cribbing
- Resistant to termites, fungus, salt and oils
- No aging or material breakdown
- Environmentally friendly and sustainable – made from recycled HDPE
- Available in more than 15 color options
- More economical long-term investment—50-year warranty

Products:

Uses:

- Paddocks
- Trailer beds
- Barn and stable pens
- Riding arenas
- Posts and fencing
